

## Goals/ Definitions

Plan for clinical studies for licensure and post-marketing.

### Clinical Development Plan initiated

(\*Clinical Development Plan is initiated prior to the FIH gate review and is updated & reviewed during development through to the DTF gate review)

CRITERIA	SAMPLE CONTENT REQUIREMENT	GUIDELINES FOR LEVEL OF DETAIL NEEDED AT EACH GATE
<ul style="list-style-type: none"> <li>▪ Clinical development plan updated</li> </ul>	<ul style="list-style-type: none"> <li>a) Overview of planned clinical activities:                             <ul style="list-style-type: none"> <li>• Study phase, objectives/research rationale</li> <li>• Duration of the studies, number of subjects, recruitment criteria (e.g., study arms, patient cohorts, comparators for non-inferiority trials, power calculations etc.)</li> <li>• Complete drug-drug interaction and special population place in place                                     <ul style="list-style-type: none"> <li>• Dosing &amp; dosing modeling strategies</li> <li>• Detailed rationale for Phase 3 dose selection</li> <li>• Toxicology and toxicokinetic results to support doses and dosing duration in Phase 3</li> <li>• Drug combination assessment &amp; plan</li> <li>• Toxicology plan to support submission (e.g., carcinogenicity, reproductive toxicology)</li> </ul> </li> </ul> </li> <li>b) Clinical partners, proposed target countries, and study sites (based on criteria including clinical expertise, sustainability, site capacity, and disease incidence/epidemiology studies, etc.)</li> <li>c) Definition of clinical endpoints (primary &amp; secondary), methodology (clinical endpoint assays, data collection plan, statistical methods, etc.), adverse event reporting, stopping rules, etc.</li> <li>d) Monitoring, data management, and biostatistics strategies</li> <li>e) Post-marketed product surveillance/Phase 4 trial strategy</li> <li>f) Mass product administration considerations (e.g., trial design, safety requirements, etc.)</li> <li>g) Off-label use considerations</li> <li>h) Trial size considerations for diseases with limited incidence rates</li> <li>i) Potential risks and mitigation strategies</li> <li>j) Timelines and budgets for clinical development</li> </ul>	<ul style="list-style-type: none"> <li>▪ Detailed Phase 3 clinical plan with timeline</li> <li>▪ Updated risk identification and mitigation needed for all subsequent phases of development</li> <li>▪ Plans should reflect approaches to accelerate decision making (e.g., adaptive designs, real-time data analysis of clinical trials etc.)</li> <li>▪ Phase 3 plan is modified during Phase 2 trial as Phase 2 data become available</li> <li>▪ Clinical development plan extends beyond DTF to accommodate the time needed to report Phase 3 results and also cover additional plans for pediatric studies and post-market surveillance</li> </ul>
